

Learning Outcome - Node Fundamentals

- Introduction to Node.js:
 - Understand the basics of Node.js.
 - Install and set up Node.js on your local machine.
 - Create and run your first Node.js application.
- Node.js Modules and the File System:
 - Explore the module system in Node.js.
 - Work with built-in and custom modules.
 - Perform file system operations using the `fs` module.
- Node.js Events and EventEmitter:
 - Understand the event-driven architecture of Node.js.
 - Use the `EventEmitter` to create and manage custom events.
 - Implement event handling in practical scenarios.
